Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance:

Regarding claims 2, 3, 4, 5, 6 the prior arts fail to teach or fairly suggest a method for use in a mobile communication system having a plurality of cell segments, comprising:

communicating control and traffic signaling in a frame having a plurality of time slots in each cell segment, the time slots being synchronized among the cell segments and;

transmitting control signaling in time slots adjacent time slots allocated as guard periods to protect the control signaling in a time slot of a first cell segment from interference by traffic signaling in another time slot of a neighboring cell segment in combination with other limitations as specified in the independent claims 2, 3, 4, 5, 6.

Regarding claims 10, 12 the prior art fail to teach or fairly suggest a method for use in a mobile communication system having a plurality of cell segments comprising:

providing predetermined time slots as guard period (idle period as recited in claim 12) to reduce likelihood of interference of signaling due to overlap of time slots in neighboring cell segments, wherein the defining includes defining a frame having eight time slots; and

allocating control signaling to be carried in odd time slots of frames in combination with other limitations as specified in the independent claims 10, 12.
